SHUBHAM MEGHANI

MCA CANDIDATE · DEVOPS / CI/CD PROJECTS
Pune, India | 6265280847 | shubham.meghani.work@gmail.com
linkedin.com/in/shubham-meghani/ | github.com/damnsunnyy

PROFESSIONAL SUMMARY

MCA candidate building a hands-on DevOps foundation through GitHub Actions CI/CD, automated validation, release visibility, and GitHub Pages deployments. Brings two months of client-focused website delivery experience, with strengths in requirement analysis, technical documentation, issue follow-through, and quality checks. Seeking entry-level DevOps, CI/CD, or cloud operations opportunities.

CORE COMPETENCIES

Git & GitHub | GitHub Actions | CI/CD Workflows | Build and Deployment Validation | Release Health Reporting | REST API Integration | Issue Triage | Technical Documentation | Requirement Analysis | Client Communication

EDUCATION

Master of Computer Applications (MCA) *Pursuing*
MIT World Peace University, Pune

Bachelor of Computer Applications (BCA)
LNCT College, Bhopal

TECHNICAL SKILLS

CI/CD: Git, GitHub, GitHub Actions, workflow validation, automated GitHub Pages deployments
Programming: JavaScript, Python, Java, SQL
Application & API: HTML, CSS, REST APIs, Node.js, React, Django, FastAPI, Supabase
Cloud familiarity: AWS, Azure **Data & AI:** Pandas, scikit-learn, PyTorch, NLP
Other tools: Power BI, DAX, Excel, Xcode, Streamlit, Microsoft Office

EXPERIENCE

Web Design Intern — Poho *2 Months*

- Designed and customized WordPress websites to meet client requirements, content structures, and responsive layout needs.
- Translated change requests into page updates and collaborated with teammates on enhancements, issue resolution, and delivery.
- Reviewed layouts across screen sizes, identified visual inconsistencies, and refined UI details to improve usability.
- Gained practical experience in client communication, requirement analysis, documentation, and delivery coordination.

SELECTED PROJECTS

RunScope — GitHub Actions Health Dashboard · *JavaScript, GitHub REST API, Node.js* · Live demo

- Built a read-only dashboard that analyzes public workflow history, including pass rate, successful-run median duration, daily trends, and grouped failures.
- Added six metric unit tests and a GitHub Actions pipeline that validates, builds, and deploys the site to GitHub Pages.

Portfolio — CI/CD Delivery Pipeline · *GitHub Actions, Node.js, GitHub Pages* · Live site

- Automated the Apply Desk asset build and site publication on pushes to the main branch using a GitHub Pages deployment workflow.
- Published the profile site, resume, project demos, and current project captures as one reviewable release.

Apply Desk — Job Search Workspace · *JavaScript, Supabase, Gmail API* · Live app

- Developed a role search and application tracking app with account-isolated records protected by database row-level security.
- Deployed the static frontend to GitHub Pages; the optional Gmail connection reads message signals only.

CERTIFICATION

Embedded Systems Bootcamp — Robonauts India: Practical exposure to embedded systems concepts and workflows.
